Full Stack Developer

Profile

I am a Computer Information Systems graduate with a combination of technical and managerial skills, and a deep understanding of how information technology connects with business needs. I possess the ability to analyze systems, design databases, and solve technical problems effectively. I aim to leverage my expertise as a Full Stack Developer to develop digital solutions that enhance organizational performance.

Experience

Full Stack Developer – Shopyard Company (2024 – Present)

- Developed and maintained e-commerce systems using PHP, Magento 2, React, Next.js, and MySQL.
- Implemented responsive frontend interfaces and scalable backend APIs.
- Customized Magento 2 modules to improve performance and add new functionalities.
- Collaborated with team members using Git, GitHub, and Jira to manage development tasks.

Frontend Intern – Polaris Company (3 Months)

- Trained in frontend development focusing on React, JavaScript, and UI/UX best practices.
- Assisted in building responsive web components and optimizing interfaces for better user experience.

Education

Bachelor's Degree in Computer Information Systems – Yarmouk University (Excellent GPA 84.7%) – 2024

Projects

Solar Energy Service

- Designed and developed the backend logic and database schema for managing solar energy services using Entity Framework Core and SQL Server.
- Built frontend components with ReactJS for user registration, appointment scheduling, and installation management.

Courses

- Web Application Development with .NET Core MVC
- API Design and Development
- Frontend Development with React
- Programming with Python
- Database Administration with SQL
- Oracle Databases
- Low-Code Development with Mendix
- C# and JavaScript
- HTML and CSS Page Design

Skills

Programming Languages: C#, JavaScript, PHP, Python
